

Succulents Care

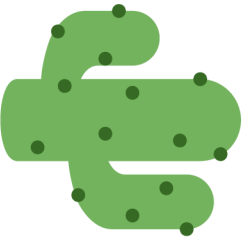

Watering:

OVERWATERING IS THE MOST COMMON REASONS SUCCULENTS DON'T MAKE IT!

- water your succulents when the soil is 100% dry.
- Water every 1-2 weeks and water thoroughly until water pours from drainage holes. They hold water in their leaves for up to a month!

Temp & Lighting

- Succulents need sun/grow lights at least 6 hours per day!
- They prefer drier/warmer environments and will be more colorful with more light!
